Continuing Education Webinar - via Go-To-Webinar or Call-in

AIR QUALITY PERMITTING FOR METAL FINISHERS

For metal finishing facilities, seemingly routine changes can have air permitting implications. Adding a process tank, changing chemistry, increasing production, modifying ventilation, or replacing emissions controls may require air district review or permit action before the change is made.

This session will provide a practical overview of air permitting for California metal finishers, with an emphasis on South Coast AQMD and examples from other California air districts. We will discuss how to recognize when a permit may be required, common exemptions, changes that can trigger permit action, and what to expect during the application and agency review process.

The goal is to help facility managers and EHS staff identify permitting issues early, understand what information an air district may need, and incorporate air permitting into project planning before equipment is purchased, installed, or modified.

REGISTER ONLINE

Include e-mails of each attendee when registering. Go-To-Webinar & call-in info will be e-mailed.
Certificates will be emailed upon request.

TIME: 1:00 pm - 3:00 pm
TOPIC: AIR QUALITY PERMITTING FOR METAL FINISHERS
WEBINAR: **VIA GO-TO-WEBINAR OR CALL IN - DETAILS WILL BE SENT TO THE EMAIL ADDRESSES YOU PROVIDE**
FEE: **\$175 per Member company and \$375 per Non-member**
SPEAKER: Michael McHale / ALL4 / Managing Consultant

REGISTER ONLINE

***DEADLINE - Midnight Before Event**

PAY ONLINE (Required to Register): **metalfinishing.org/edu101426**
