Continuing Education Webinar - via Zoom or Call-in

CAL/OSHA LOCKOUT TAG-OUT & CONFINED SPACE HAZARD

Review of **Lockout Tag-Out Programs**. Anytime your facility performs any kind of adjustment or maintenance on machinery or power systems it is required to use their Lockout Tag-Out Program. The Lockout Tag-Out Program is one of CAL/OSHA's top 5 Programs that are required by every business.

Confined Spaces? Tanks and Ovens! CAL/OSHA announced its special emphasis program on confined-space hazards. If an inspector shows up at your facility for whatever reason, you will be asked for your Confined Space Program along with your other written safety programs.

What's a confined space? Do you have plating tanks and/or waste treatment tanks, sumps, and/or crawl spaces under floors, etc that:

- Is large enough and configured such that an employee can bodily enter and perform work;
- Has limited openings for entry and exit;
- Is not designed for continuous employee occupancy;
- Has the potential for a hazardous atmosphere that may include the lack or too much oxygen, and/or the presence of toxic chemicals/vapors; and/or
- Has a physical safety hazard such as machinery, liquids, or loose unstable materials that can cause employees to be trapped or buried.

In general, the Confined Space Regulations **require** employers to have:

- A written confined space program, including recognizing and marking all confined spaces on site;
- Procedures to test and monitor the air inside confined spaces before and during all entries;
- Procedures to prevent unauthorized entries and to have an attendant outside the space at all times;
- Effective controls of all existing atmospheric or safety hazards inside the confined space, including lockout/tagout procedures;
- Employee and supervisor training on safe work procedures, hazard controls, and rescue procedures; and
- Effective rescue procedures which are immediately available on site.

This training class will cover what is and what isn't a confined space, how to classify them and declassify them, the difference between a confined space and a permit required confined space. The equipment necessary to conduct a confined space and rescue procedures.

Remember, even if you bring in outside people to do the work, they have to follow your confined space procedures.

If you never do a confined space entry, you still need to classify and identify all confined spaces, have a company policy to that effect and train your employees.

Include e-mail addresses of each attendee below. Zoom Webinar and call-in info we will e-mail. *Certificates will be emailed.*

TIME: 1:00 pm - 3:00 pm
TOPIC: **CAL/OSHA LOCKOUT / TAG-OUT & CONFINED SPACE HAZARD**
WEBINAR: VIA ZOOM OR CALL IN - Details will be emailed. Provide an email for each person below
FEE: **\$175 PER MEMBER COMPANY / \$375 PER NON-MEMBER COMPANY**
